Subject: Council Meeting Testimony

Aloha Council Chair and Council Members,

I strongly support passage of Resolution 11-328. Passage of the resolution will ensure the best possible rail project and that Steel on Steel not be the method used.

I recently viewed a video of the Bart system, which I have used and it reminded me how noisy the steel and steel rail sounds.

The noise from steel on steel rail is outrageous.

Please consider MagLev "if" we have to have the rail project that no one will use.

Mahalo,

AL Frenzel
(808) 343-4916
